Projects

Alumni Tracking System (Capstone Project)

- Jan. 2023 - April 2023
- Developed a registration site and portal for alumni that contains announcement of events and allows the user to update their employment status.
- Developed a web application for administrator that retrieves the information of entries, organizes data, print reports, and allows the user to post an announcement of events.

IT Equipment Inventory System

- Aug. 2022 - Sep. 2022
- Developed a inventory system that allows the admin to record equipment, users, transaction date and other relevant data.

Digital Library

- June 2022 - July 2022
- Developed a digital library system that allows user to save the URLs of files from google drive including some relevant details.

Student Information Management System

- May 2022 - June 2022
- Developed a simple recording management system (CRUD) that allows the user to record the information of students.
